Design Guidelines for the installation of Water Storage Tanks

Herewith, please find the guidelines with regard to the installation of water storage tanks.

1. All proposed water storage tank installations are to be submitted to ARCHOM for approval prior to commencement of any work on site. Full details of the tank, positioning and screening are to be included.
2. The style and situation of each house or complex will be assessed and taken into consideration.
3. Installation of tanks must meet with the approval of all parties concerned, ensuring that no views are spoilt or any encroachment on any other property occurs.
4. All storage tanks facing onto a Harbour Island internal street shall be screened from public view.
5. All storage tanks in rear gardens facing public roads may not be visible from these public roads.
6. All relevant lateral and front boundary wall heights are to be adhered to for screening purposes.
